

# OutWatch

## AI Analytics Alarm Monitoring Server

Up To 98% Accuracy, **Analytics You Can Trust**

OutWatch provides AI based alarm monitoring with real-time alarm verification. Alarm images are analyzed using our proprietary AI Vision analytics model. We reduce false alerts by about 95%, only verified alerts are sent as alerts to the user's smartphone.

View alarms and manage all of your Outdoor cameras from PC / Smartphone anywhere, anytime.

### HOW IT WORKS?

#### 1. CAMERA DETECTION

Cameras with motion detection/analytical send alarms to the OutWatch server.

#### 2. ANALYZING

Alarm images are analyzed using our model of "AI Vision" analysis. Alarms and the results of the analyses AI can be viewed and managed in real time on the server from OutWatch.

#### 3. ALARM NOTIFICATION

In case a threat of interest is detected, the alarm "push" notification will be sent immediately to the smartphone of the end user.

# AI Based Alarm Verification

**CHOOSE THE THREATS OF INTEREST AND THE LEVEL OF SENSITIVITY FOR EACH THREAT**

**Humans**

**Animals**

**Vehicles**

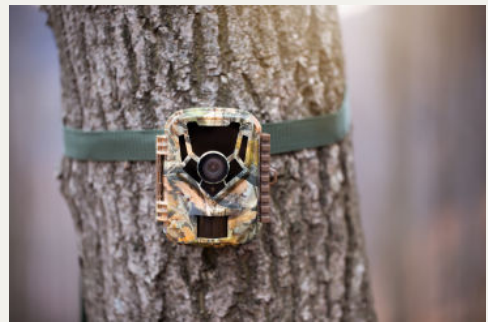

**Trucks**

**PLATFORM OPEN TO EVERYONE**

**CCTV Cameras**

**Trail Cameras**

## CENTRALIZED ALARM MANAGEMENT
